MY WORKS

ABOUT ME

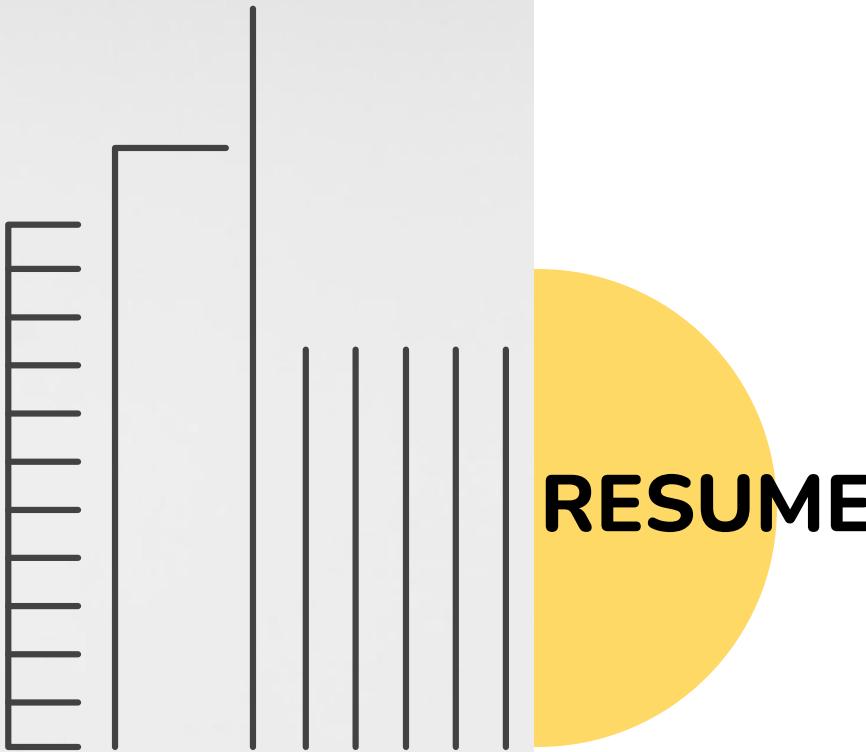

I am a Architect with over 5 years 6 months of professional experience in architectural design, interior design, and project execution. My work spans residential, commercial, and corporate projects, where I have been involved from concept development to final handover.

I believe good architecture is a balance between design clarity, functionality, and buildability. I focus on creating spaces that are not only visually strong but also practical, cost-effective, and responsive to client needs. My role often bridges design intent and site execution, ensuring that ideas are translated accurately on ground.

“Designing spaces where vision meets execution.”

With strong experience in team leadership, consultant coordination, client interaction, and site management, I take responsibility for quality, timelines, and detailing. I am particularly interested in clean, contemporary design with thoughtful material use and attention to detail.

Architecture, for me, is a continuous learning process each project shaping better solutions, stronger spaces, and meaningful built environments.

Bishop Heber Higher Secondary School,
Teppakulam, Trichy.

COLLEGE : Bachelor of Architecture
(2015–2020)
Dhanalakshmi School of Architecture,
Samayapuram, Trichy.

ACADEMIC ACTIVITIES

Architect College Campus
Apartment
Hotel Design

THESIS: MEDICAL COLLEGE & HOSPITAL

BACHELOR OF ARCHITECTURE

SENIOR ARCHITECT

PROFILE SUMMARY

Senior Architect with over 5.5 years of experience in residential, commercial, and corporate interior fitout projects. Proven expertise in leading projects from concept to completion, managing multidisciplinary coordination, preparing detailed construction documentation, and overseeing site execution. Strong in client handling, team coordination, and problem-solving, with a consistent track record of delivering high-quality projects on time and within scope.

PROFESSIONAL EXPERIENCE

INTERNSHIP – SV CONSULTANT, Bangalore (Jun-2018–Jun-2019)

Gained hands-on experience in residential and commercial architectural projects. Prepared detailed 2D drawings including floor plans, sections, and elevations using AutoCAD. Supported senior architects in design development, documentation, and preliminary site coordination, developing a strong foundation in architectural practice and standards.

JUNIOR ARCHITECT → ARCHITECT – ROYAL SHELTER, TRICHY

(July-2020 – Sep-2023)

- Progressed into a key architectural role at one of Trichy's leading residential developers, contributing to large-scale housing projects such as Royal Elite, Royal Kalpataru, and Royal Windgates.
- Led architectural activities from concept design through execution, ensuring design intent, statutory compliance, and constructability.
- Prepared and coordinated working drawings, plumbing layouts, and consultant drawings for smooth site execution.
- Developed 3D models and client presentation drawings to support approvals and design decisions.
- Conducted regular site inspections, resolved design and execution challenges, and coordinated with contractors, consultants, and internal teams to maintain quality, timelines, and project standards.

PROJECT ARCHITECT – ARCHI DEE SIGNS, TRICHY (Oct-2023 – Oct-2024)

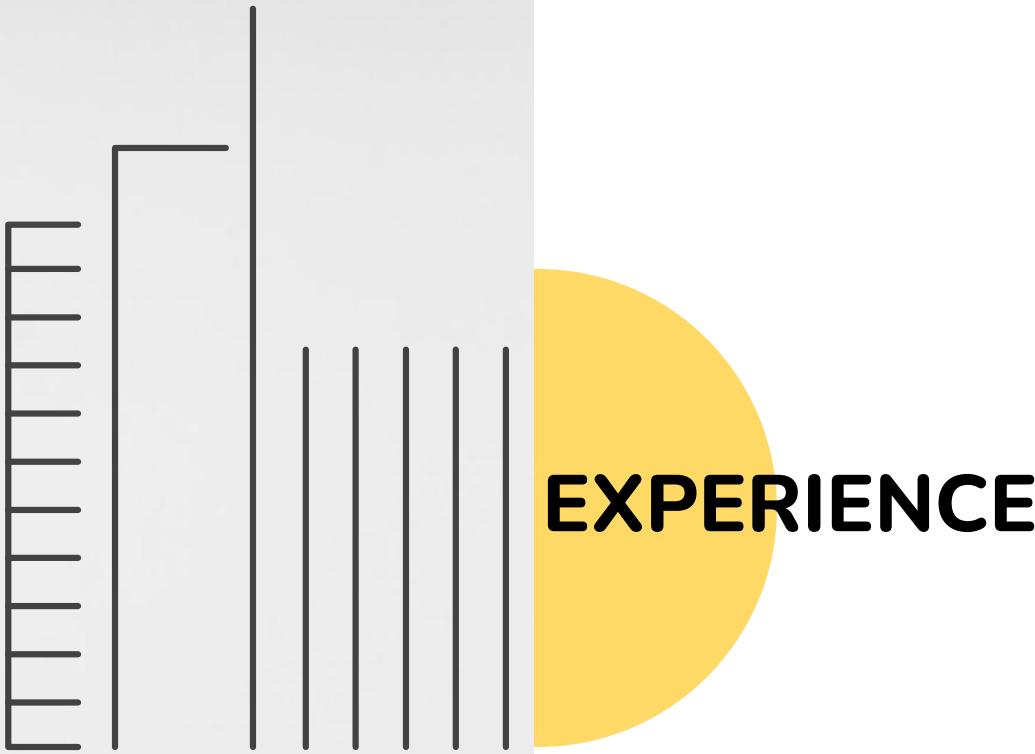

- Handled diverse project typologies including Luxury Villas, TN Government Interior Fitouts Projects under Startup TN (Salem, Erode & Cuddalore) and Morais City Development works.
- Managed projects independently from concept design to final execution.
- Led design development, detailing, and documentation including working drawings, plumbing layouts, and construction coordination drawings.
- Oversaw site execution and quality control, addressing on-site design issues and ensuring compliance with approved drawings and specifications.
- Played a key role in client presentations, design coordination, and project delivery.

PROJECT ARCHITECT – TOUCHSTONE INFRASTRUCTURE SOLUTION & PVT LTD, CHENNAI (Nov-2024 – Dec-2025)

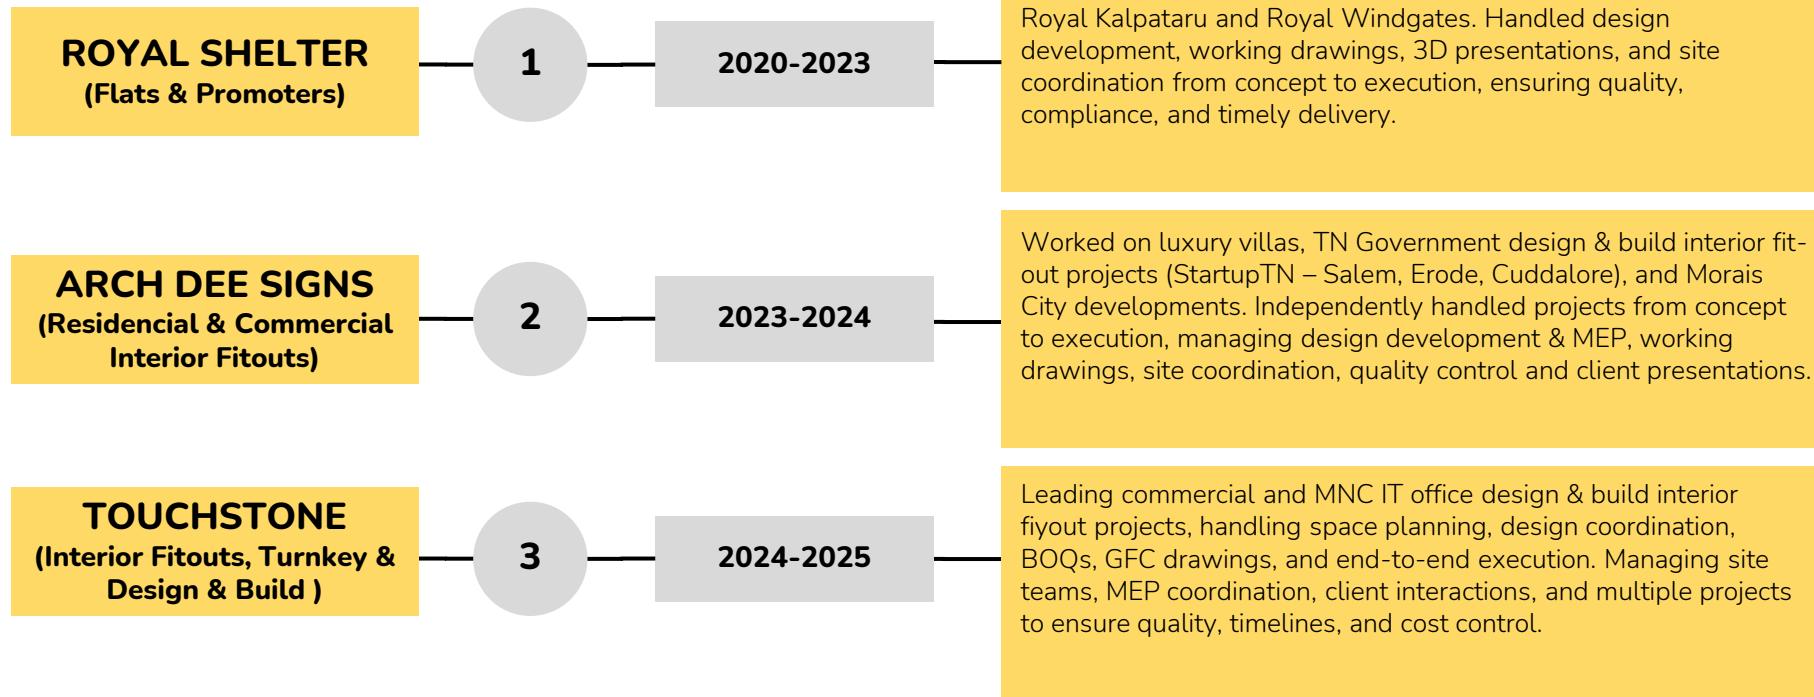

- Working as a Project Architect, leading multiple commercial and MNC IT office interior fitout projects.
- Responsible for space planning, design coordination, and project execution from design freeze to handover.
- Prepare detailed BOQs, GFC drawings, and execution drawings, ensuring accuracy and constructability.
- Lead site execution, coordinate with MEP vendors, consultants, and contractors, and manage multiple projects simultaneously.
- Act as the primary client interface, ensuring alignment of design intent, cost control, timelines, and quality standards.

The Mastec Quadgen corporate office is located at Samadura Capital Towers, Bangalore, designed across a 20,000 sq.ft area to accommodate 455 workstations. The project focuses on creating a highly efficient workspace with a strong emphasis on contemporary office planning. A modern and minimalist 3D design approach was adopted for the project, featuring clean lines, neutral color palettes, and clutter-free spatial planning. The layout ensures optimal space utilization, smooth circulation, and a professional work environment that enhances productivity and collaboration.

DSV – Chennai International Cargo Office Interior design for DSV, a global logistics & international cargo services company, located inside the Chennai International Cargo Complex. The 1800 sq.ft workspace is efficiently planned to accommodate 29 workstations, with a focus on modern, minimal design and functional space utilization tailored to logistics operations.

DSV KRM PLAZA

LOCATION : CHENNAI

DSV – Chennai International Cargo Office Interior design for DSV, a global logistics & international cargo services company, located Numgambakkam KRM plaza. The each floor are 7000 sq.ft workspace these are the existing DSV office but fully renovate the whole space with new design & ideas. Efficiently planned to accommodate workstations, with a focus on modern, minimal design and functional space utilization tailored to logistics operations.

This project represents one of the largest corporate interior fit-out works undertaken, spanning 65,000+ sq.ft across a G+5+Terrace floor configuration in Bangalore. The design approach is rooted in minimalist architectural expression combined with advanced space planning efficiency to support high-density, large-scale operations. A strategic integration of linear and L-shaped workstations, along with specialized laboratory facilities, ensures functional clarity, adaptability, and seamless workflow across all floors. The project reflects a balance between spatial discipline, operational performance, and refined corporate aesthetics, aligning with global workplace design standards.
